Sure! Here's an example training data that includes weather condition, traffic condition, and passability due to floods for the given locations:

Data 1:

Location: Natividad Lopez Street

Weather: The weather in Natividad Lopez Street is currently cloudy with a chance of rain. There are occasional gusts of wind as well.

Traffic: The traffic in Natividad Lopez Street is relatively smooth at the moment, with only a few vehicles on the road.

Flood: There are no reports of floods in Natividad Lopez Street, so it is passable.

Data 2:

Location: Taft Avenue

Weather: Taft Avenue is experiencing heavy rainfall accompanied by thunderstorms. It is advisable to stay indoors during this weather condition.

Traffic: Due to the heavy rain, the traffic in Taft Avenue is congested. The vehicles are moving slowly, causing delays.

Flood: Taft Avenue is prone to flooding during heavy downpour. There have been reports of water accumulation on the roads, making it difficult for vehicles to pass through.

Data 3:

Location: P. Faura Street

Weather: P. Faura Street is currently experiencing a light drizzle, with overcast skies. There are chances of the rain intensifying later in the day.

Traffic: The traffic flow in P. Faura Street is normal, without any significant congestion or delays.

Flood: There are no reports of floods in P. Faura Street, so it is passable.

Data 4:

Location: M. Adriatico Street

Weather: M. Adriatico Street is under clear skies, with no signs of rain. The temperature is mild and pleasant.

Traffic: The traffic in M. Adriatico Street is light, with few vehicles passing through.

Flood: There are no reports of floods in M. Adriatico Street, so it is passable.

Data 5:

Location: Pedro Gil Street

Weather: Pedro Gil Street is currently experiencing scattered showers, which might continue throughout the day. It is advisable to carry an umbrella.

Traffic: The traffic in Pedro Gil Street is moderately congested due to ongoing road repairs. Expect some delays.

Flood: Pedro Gil Street is prone to flooding during heavy rain. It is recommended to avoid the area if possible.

Data 6:

Location: Gen. Malvar Street

Weather: Gen. Malvar Street is currently experiencing strong winds and heavy rainfall due to a typhoon. It is advised to seek shelter and stay indoors.

Traffic: Due to the typhoon, the traffic in Gen. Malvar Street is disrupted. Many roads are closed, causing significant delays and diversions.

Flood: Gen. Malvar Street is severely flooded, making it impassable for both vehicles and pedestrians. It is advised to avoid this area until the floodwater recedes.

Please note that this is a fictional example and the actual weather, traffic conditions, and flood situations may differ. Feel free to customize or modify the data as per your requirements.
